## About our honey

Odyssea honey is produced in the village of Ilias in central Greece by artisan bee-keeper Alexandros Gousiaris. Alexandros lovingly tends his bees ensuring they are protected in winter and moved to the Greek mountains or islands in the summer where herbs, wild flowers & conifers grow in abundance.

Alexandros and his small team harvest the honey from the beehives by hand and is extracted cold from the becomb and only very minimally filtered. It's these traditional production methods that ensure the flavour and nutritional values of our exceptional tasting honeys remain.

## The Brass Pepper Mill

The design of this gorgeous brass pepper mill is based on the coffee grinders used by Greek soldiers when out in the field some 300 years ago.

The internal mechanism was designed to crack coffee beans, which enables it to grind peppercorns rather than crush them.
